Experience

2020 – Present

System Engineer

Infosys

Have designed and implemented a web crawler and tool for migrating structured data to elastic using python based on Agile. Web crawler supports crawling data from different sources (Internet or Intranet) Web pages with authentication and pagination. Migrating data from SQL, MS SQL, MONGO, CSV to Elastic. API deployed on Cloud.

Search engine based on Java worked on different search modules like the type-ahead suggestion, content-based search has worked on optimizing code performance, and bug fixes to complete all activity intensively worked with JMeter, Visual VM.

2019 – 2020

One of Leading Shoe Brand from Germany

Infosys

Handled End-to-End Test planning, test case creation, execution, and reporting for Order Fulfilment system. Performed Integration and Unit Testing on different modules. Hands-on experience on JIRA, Jenkins, and J Meter. A clear understanding of all steps and concepts involved in order fulfillment and supply chain management for e-com.

Worked on creating automation scripts based on Java, selenium framework for generating orders and fulfillment of orders. Actively interacting with the client for successful completion of the project.

Dec 2018 – 2019

System Engineer Trainee

Infosys

Been trained in Python and Java. Designed a mini project end-to-end responsive e-commerce web application using ELK stack, Open Source API, ZUUL, Eureka, and Angular 4 using the agile methodology (Scrum).
