# Experience

## 2020 – Present

### System Engineer, Infosys Ltd.

Have designed and implemented a web crawler and tool for migrating structured data to elastic using python based on Agile. Migrating data from SQL, MS SQL, MONGO, CSV to Elastic. Used Flask to develop APIs and deployed on Cloud.

Implemented different data structure and algorithm for new Type Ahead suggestion in search engine. Worked on redesigning existing service.

Worked with different search modules like the type-ahead suggestion, content-based search. Also worked on Optimizing code performance, and bug fixes to complete all activity intensively worked with JMeter, Visual VM, Jira.

## 2019 – 2020

### Leading Shoe Brand from Germany, Infosys Ltd.

Handled End-to-End Test planning, test case creation, execution, and reporting for Order Fulfilment system. Performed Integration and Unit Testing on different modules. Hands-on experience on JIRA, Jenkins, and J Meter. A clear understanding of all steps and concepts involved in order fulfillment and supply chain management for E-commerce.

Worked on creating automation scripts based on Java, selenium framework for generating orders and order fulfillment. Actively interacting with the client for successful completion of the project.

## Dec 2018 – 2019

### Intern, Infosys Ltd.

I was trained in Python and Java. Designed a mini project end-to-end responsive e-commerce web application using ELK stack, Open Source API, ZUUL, Eureka, and Angular 4 using the agile methodology (Scrum).
